InfoSci[®]-Databases Platform

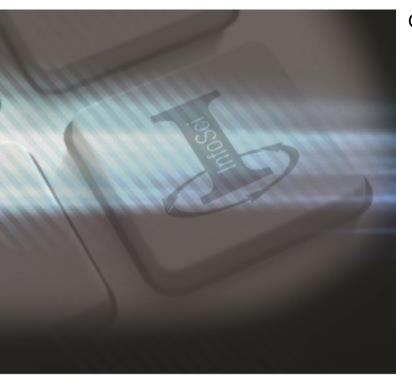

Fully Customizable Databases for Emerging and Innovative Research

InfoSci®-Databases Platform

User Guide 2018

Getting Started:

Headquartered in Hershey, Pennsylvania, IGI Global is a leading international academic publisher committed to facilitating the discovery of pioneering research that enhances and expands the body of knowledge available to the research community. Working in close collaboration with expert researchers and professionals worldwide, IGI Global disseminates vetted quality content within 11 core subject areas, including Business and Management; Computer Science and Information Technology; Education; Engineering; Environment and Agriculture; Government and Law; Library and Information Science; Media and Communications; Medicine and Healthcare; Security and Forensics; and Social Sciences and Humanities.

Celebrating 30 years of publishing excellence, IGI Global boasts an ever-expanding portfolio of over 4,500 reference books, 175 highly indexed journals, 100 video lectures, and a broad collection of InfoSci®-Databases, hosting IGI Global's entire collection of advanced ebooks, e-journals, and videos covering the most soughtafter research concepts on one user-friendly, XMLpowered platform. The InfoSci® platform is one single, centralized, and personalized gateway for your institution.

This user guide is designed to assist you in utilizing the InfoSci[®] platform while showcasing the features and benefits of this platform, which can be accessed at the following URL: <u>www.igi-global.com/gateway</u>.

Customization

 Personalize the InfoSci[®] platform The InfoSci[®] platform allows for institutionspecific customization. Librarians may add their institution's name, logo, and other additional personalization to the platform.

Additional institution customization includes: Enabling "Your Copy" feature, which allows institution users to purchase print titles at a discounted price, including unowned or free titles in search results, managing authorized IP Addresses, and enabling subscriber links in Google Scholar search results.

For further assistance, contact IGI Global's Databases Team at <u>eresources@igi-global.com</u>.

Resources

There are several tools available for users on the $\mathsf{InfoSci}^{\textcircled{B}}$ platform.

2. Librarian Resources

Contains librarian resources and tools such as title lists, LibGuides, COUNTER reports, MARC records, and persistent URLs. To gain access to these features, librarians must first create an account (in the top right) and register as a user, and then e-mail <u>eresources@igi-global.com</u> to request administrative access.

3. Research Collections

This section shows all the collections that your library has access to.

- Database Search Allows you to search the database with three options – Basic, Advanced, and Expert.
- 5. Research Tools

Contains Help, User Guide, and a list of the members of the Library Advisory Board (LAB).

6. User Resources

This section contains resources for platform users and is broken into three categories – Researchers, Authors, and Librarians.

Search Functionality

Under the "Database Search" dropdown menu, you will be able to select one of three search options.

1. Basic

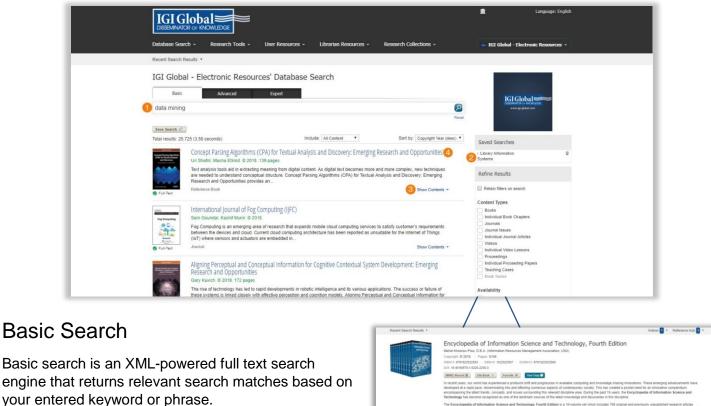

Basic Search allows you to search desired items and refine your results using the menu on the right. You can define your search by Content Type, Copyright Year, Subjects, and Categories.

2. Advanced

Advanced Search is used to quickly and easily narrow fields in your initial search. An advanced search allows you to search by Full Text, Title, Author, ISBN or ISSN, DOI, and Copyright Year.

3. Expert

Expert Search is unique to IGI Global and offers a detailed search option for users, allowing them to search with certain terms excluded, included, or weighted within the results. The Expert Search function also permits for the use of Boolean search terms.

Here is an Example:

 Say you are researching the topic of Data Mining. Enter Data Mining into the basic search box and click the search icon.

- You can additionally refine your results with the Refine Results menu navigation to the right. Refinement options can include Content Type, Database, Copyright Year, Subjects, or Subject Topics. The Refine Results menu is based on your institution's holdings.
- 3. You are also able to sort your results by Relevancy, Title, and Copyright Year.
- 4. At this point, you can also click on Show Contents within the returned search results. The Show Contents feature offers you a scrolling menu of the table of contents, as well as the option to search the full text of the title, without leaving your main search results page.
- 5. You may also navigate to the landing page for a given search result by clicking the result's hyperlinked title. The landing page provides functionality to create citations, tag as a favorite, view TOC, access supplementary material, and much more.

Advanced Search

The advanced search is primarily used to quickly and easily narrow your search fields in your initial search. Users may choose to search by Full Text, Author, DOI, Title, ISBN/ISSN, and Copyright.

Here is an Example:

- 1. Database is typed into the Full text search box, Smith is typed into the Author search box, and the Copyright fields start from 2015 through 2018.
- 2. You are then able to sort your results by Relevancy, Title, and Copyright Year.

Expert Search

The expert search is unique to IGI Global and offers a detailed search option for users. Here you can search with certain terms excluded, included, or weighted within your results.

Here are some Examples:

- Exclude Words: This search option allows users to enter words that should be excluded from search results. For example, you might like to do a search on database management systems but exclude Linux.
- 2. Weighted Matching: This functionality allows the user to specify the ranking that they would like to give to each term entered into the search engine. The full text search uses the weighting entered by the user to rank and rate the results returned to the user. With database management systems in a search box, and Linux excluded, now add women as an additional search term. Set the weight to 60% for database management systems. Set the search term to 40% for women. The total assigned weights must equal 100% when performing the search.
- 3. **Inflectional Words**: Inflectional word search is a searching tool with a dictionary and thesaurus built into the search engine. It automatically searches all forms and tenses of the word(s) entered and offers synonyms in the search results. The example above shows an inflectional search for the term **women**.

Book & Journal Features

Each individual book, journal, article, and chapter on the InfoSci[®] platform has its own individual webpage. This webpage contains details on the title, individual book chapter, or journal article.

Here are Examples:

- 1. Cite the text.
- 2. Mark it as a favorite in your **Profile.**
- 3. **Search** only the contents of the shown publication. The "Show and Search Contents Feature" applies to full book titles or journal issues only.
- 4. **Full Book/Journal Issue** Download If your institution is an InfoSci[®]-Database customer, you are able to download the full book or journal issue when you are logged in and IP authenticated.
- 5. **Your Copy** This option allows you to purchase the print title of an e-book owned by your institution through the IGI Global Online Bookstore at a 50% discounted price.
- 6. Indices Easily and quickly see what indices a specific journal is included in.
- 7. Reference Hub Allows you to see where the research contained within the journal has been cited.

Available Citations

There are several options available for citing research, including MLA, ALA, and Chicago.

The InfoSci[®] platform, in cooperation with RefWorks, EasyBib, EndNote, and Mendeley, provides citation exporting tools for researchers. You must have your own accounts with these partners to export citations of content available on the IGI Global platform for use in their references.

To Use: Click on the **Cite Book** button and pick the option that works best for you from the pop-up menu.

Profiles, Favorites, and Saved Searches

Creating a User Profile: Clicking on login at the top right of the InfoSci[®] platform will allow you to create a personal profile.

Once you create a profile and are signed in to the InfoSci[®] platform, you can click on the email you used to register and manage your **Profile**, **Favorites**, and **Saved Searches**.

- 1. **Profile**: Here you can add all of your pertinent information.
- 2. **Favorites**: Here you can see saved favorite books, journals, chapters, or articles, and utilize filtering and display options. You also have the ability to select items from your favorites list and e-mail the PDF version, e-mail the selected content's information and links, or remove an item from your favorite's list.
- 3. **Saved Searches**: Saved searches can be named for easy recall. When logged in, saved searches become available on the right-hand navigation menu, above Refine Results.

Need Assistance?

Thank you for being an IGI Global customer! We're looking forward to working with you.
